Cooperation and training on
innovation and entrepreneurship
in the eHealth community

Co-funded by
the European Union

#1 Newsletter of the CONNECT eHealth Community

About Us

CONNECT - *Cooperation and training on innovation and entrepreneurship in the eHealth community* is an Erasmus+ project designed to foster cooperation and skills in health innovation, through a multidisciplinary training for higher education students.

The CONNECT eHealth Community represents a large academic community of people from Europe who are creating eHealth education and innovation, providing state-of-the-art training and education of students necessary on the health market, in the form of a highly-and-systematically organized formal and non-formal educational program to improve knowledge, develop cross-sectoral skills and competences, entrepreneurship and support students' critical thinking required to improve health care. It brings together key players and influencers to promote innovation and collaboration for better healthcare enabled by technology. The project consortium partners are Babeş-Bolyai University (BBU), INIT Association (INIT), University of Porto (UPORTO), and European Initiative for Education (EIE).

What do we want to create?

The eHealth market is growing exponentially, and anyone wanting to work in this domain needs up-to-date information. There is a lack of curriculum for this area of study, and a dire need for specialists.

Our project addresses actions that promote innovative pedagogies and methods for teaching, learning, and assessment and supports educators and learners to use digital technologies in creative, collaborative, and efficient ways. These resources will significantly impact active learning through peer-to-peer and mentor-to-mentee learning, collaboration, managing teaching, and learning experiences.

A curriculum centered around theoretical and practical subjects within the eHealth domain was developed as an online book, which will be adapted as an interactive online resource, and soon to be available on the eHealth Community of Practice platform for managing eHealth eLearning. It will be addressed to individuals with a background in health care, information technology and computer science, social sciences, marketing, management or entrepreneurship in digital health.

Our platform will be created as a space where people interested in this domain can learn, find a community, and discuss with others so that they can come up with innovative solutions.

CONNECT also aims to create a bridge between professionals working in this domain so that they can create interdisciplinary networks. The project produced a comprehensive set of resources to support eHealth education, and it will be updated in 2022. If you are interested, stay close to our project development.

Join the community

If you are an academic professional, an NGO, or an individual genuinely interested in eHealth innovation, this is your invitation to join us at the eHealth Networking Days and in our eHealth Community of Practice - A transnational network of key actors, aiming to establish collaborations, exchange best practices and facilitate long-distance mentorship for students.

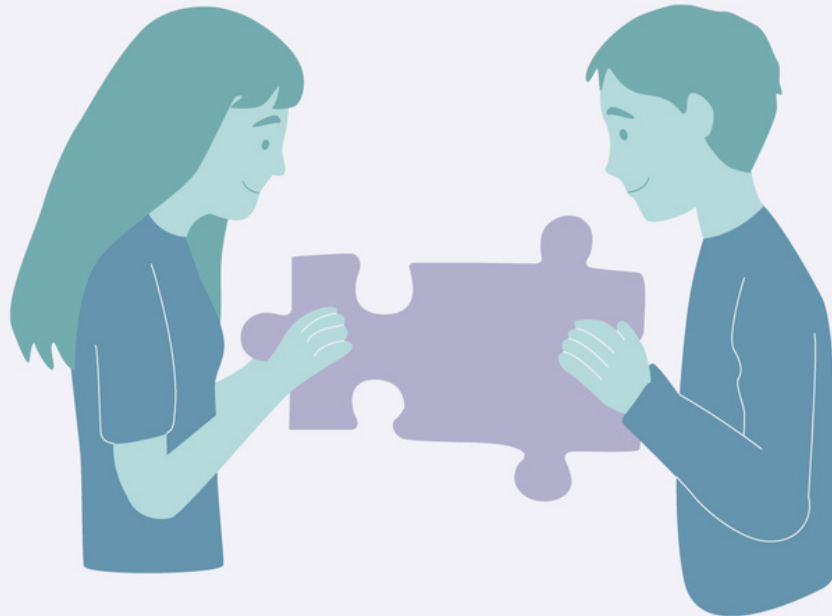

Your valuable expertise will contribute to the creation of a propitious educational environment that will bring positive effects to the beneficiaries of the project.

eHealth Networking Day

The eHealth Networking Days are on-site events organized by partners of the CONNECT Strategic Partnership this Spring, aiming to bring together key players with bright minds that will foster learning, inspiration and wonder for better healthcare enabled by technology. We will keep you posted with exciting news in the following newsletters.

Let us help you!

Please fill out the following short 5-question survey in order to better understand your needs and expectations regarding this event.

Get in touch with us

Subscribe to learn what the future holds for physicians, developers and entrepreneurs alike in digital health using the following link: <http://eepurl.com/hPa0yn>

To get you started, we will present some articles, explain the trends driving medicine's future, and introduce upcoming events that we are really excited about. We bring curated insights around digital health and public health education to our community.
